

To whom it may concern,

As a subscriber and listener of satellite radio I am concerned about the attempts of the NAB to restrict what I am able to listen to as a paid subscriber. Since I first became aware of satellite radio I stopped listening to AM FM radio altogether. For years these formatted stations have been giving me the same canned material, and as far as I'm concerned are not even worth listening to for free. Satellite radio is here to stay because it is simply a better product. I respectfully ask that the programming on Satellite radio be left as is.
